

# Project Pitch: 3D Experience for EhB Potential Students

---

## Introduction

---

Our project aims to create an immersive 3D experience where potential students can explore a virtual environment. This will allow them to view the available academic programs at EhB and receive detailed information in an engaging and interactive way.

## MVP (Minimum Viable Product)

---

The core of the project is to create a 3D environment that:

- Allows users to navigate and explore.
- Displays information about the programs and courses offered.

## Additional Features (Optional)

---

To enhance user engagement, we plan to add mini-games within the 3D environment. Potential games include:

- Archery
- Mini Football

## Inspiration

---

- [Summer Afternoon](#)

## Applicant Requirements

---

### Must have

- Passionate about web development

### Nice to have

- 4 year of professional Experience with React
- 56 year of Experience with Tailwind
- Experience with Three.js
- Experience with 3D modelling
